## Recommendation

[Initiate Rescan](#)

We noticed that your site is accessible over HTTPS, but still defaults to HTTP.

Automatically redirecting from HTTP to HTTPS helps ensure that your users get served a secure version of your site.

## Suggestions

### Looking for improved security and have a user base of only modern clients?

Take a look at the [Mozilla “Modern” TLS configuration](#)! It provides an extremely high level of security and performance and is compatible with all clients released in the last couple years. It is not recommended for general purpose websites that may need to service older clients such as Android 4.x, Internet Explorer 10, or Java 6.x.
